PLEXIGLAS®

Transparent LED table

Market segment

Lighting Technologies

Product

PLEXIGLAS® XT Clear 0A000, thickness 25 mm, laser engraved, thermoformed, edges polished to a high gloss, fitted with RGB LEDs

Selection criteria

Excellent light transmission; extremely malleable and easy to process

Processor

Designpanel GmbH, Nürnberg
www.designpanel.de

Application description

A transparent bistro table with multicolor illumination. RGB LEDs serve as the light source. Light from these LEDs is conducted through laser-engraved lines to produce a uniform lighting effect over the entire tabletop.

A remote-control unit allows users to set different colors and to activate the alternating color program.

The tabletop measures 4000 mm x 1000 mm; the table height is approx. 950 mm.
